

Satellite radio (specifically XM) offers a service that I can't get elsewhere. It provides up-to-the-minute traffic services 24 hours a day. NO radio station does that. It provides higher sound quality, and greater range than any radio station.

It smells of anti-competitive legislation to allow the NAB (a group of radio stations) to regulate a totally separate PAID service.

Please reject petition 04-160 immediately, and allow consumers access to the quality programming that they desire and are willing to pay for.

Thanks,

Bruce
